

# Sarasota County Emergency Management

## Flash Report #10

March 9, 2020

Activation Level 3: Monitoring

Event Name: COVID-19

### State EOC Activation

Level 2

### Watch, Warnings, Advisories

None at this time.

### Possible Impacts

More cases of COVID-19 are likely to be identified in the coming days, including more cases in the United States. It's also likely that person-to-person spread will continue to occur, including in communities in the United States. It's likely that at some point, widespread transmission of COVID-19 in the United States will occur.

### Timing

Symptoms may be mild to severe and may appear 2-14 days after exposure.

### Key Points

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to this virus. As a reminder, the Department always recommends everyday preventive actions to help impede the spread of respiratory diseases, including:

Avoiding close contact with people who are sick

Staying home when you are sick and avoiding contact with persons in poor health;

Avoiding touching your eyes, nose and mouth with unwashed hands;

Covering your cough or sneeze with a tissue, then disposing of the tissue;

Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing; - If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty;

Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial

### Situation

As the State continues to respond to the new cases of COVID-19 the Governor issued an Executive Order.

This action will allow State resources to be deployed as necessary to support local government response and mitigation efforts. We are sharing this with all of our partners for situational awareness and will continue to provide updates as new information develops.

As of 10 a.m. today, Sarasota County has not received any new presumptive positives of the novel coronavirus, or COVID-19. The Florida Department of Health has created a COVID-19 Resource Tool Kit that contains COVID-19 specific infographics that can be printed and used by the community (to view the tool kit scroll towards the bottom of the page and click the "Resource Tool Kit" icon on the left side of the screen.

The Florida Department of Health reminds everyone that the elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness. Please remember to wash your hands with soap & water. cover your coughs & sneezes with your arm, not your hands. If you're sick, stay at home & avoid crowds.

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two presumptive positive cases in Florida.

If you have been to China, Iran, Italy or South Korea in the past 14 days you need to self-isolate for 14 days. If you become sick during self-isolation please call your county health department and ask for the epidemiology department.

DOH Sarasota is monitoring community health trends on a daily basis to help identify any possible cases of COVID-19. Additionally, the department is serving as an expert resource for health care providers and the public, and working to make sure that health care providers know what to look for and what to do if they suspect COVID-19 in a patient.

The Florida Department of Health continues to work closely with all patients, potential close contacts of the patients and health care providers to isolate and monitor persons who may have been exposed to COVID-19 and implement testing of anyone who may develop COVID-19 symptoms, including fever, cough or shortness of breath.

The Florida Department of Health has expanded its COVID-19 call center hours to 24/7, 1 (866) 779-6121

### Sarasota County Actions

The Emergency Management Team is monitoring the spread of COVID-19. EM is coordinating, planning, and implementing preparedness actions with the Department of Health, DOH Sarasota is coordinating preparedness actions with the State and coordinating with local partners as needed.

The EM team is coordinating critical resource needs with the Department of Health, Public Safety, Hospitals, and other partners. These partners received an invite to the Smartsheet form to input available resources.

Sarasota County Emergency Management will be participating in conference calls with the Florida Division of Emergency Management every Monday and Thursday and will continue until further notice.

EM and Department of Health continue to monitor and will implement another City/County/Constitutional Leadership call based upon development of positive community acquired COVID-19 cases or to discuss further actions based upon DOH/CDC direction. Should that be necessary all partners will receive an invitation to the conference call via the Situation Unit.

### Locations with Confirmed COVID-19 Cases

### Directors

All personnel should ensure staff is situationally aware of the spread of COVID-19 and personal protective measures to reduce or prevent influenza like illnesses. Any information regarding employee communications and messaging coordinate with Sarasota County Communications Department. All department and agencies with potential press releases coordinate with Sarasota County Communications Department by calling 861-NEWS or news@scgov.net. If the situation escalates, Flash Reports will be replaced with Situation Reports.

### COVID-19 Monitoring Timeline

### All Agencies and Partners

Please ensure that all field personnel that do not receive e-mail communications are informed of daily updates and are provided the Florida

for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

**115**  
Total Pending Results

**People Under Public Health Monitoring:** The number of people under public health monitoring includes those at risk of having been exposed to COVID-19 who are monitoring their health under the supervision of public health officials.

**Florida Cases Repatriated:** The United States Department of State officially coordinated the return of a person living in Florida to the United States and those persons are isolated at a federally designated site until healthy. A repatriated case is when the United States Department of State officially coordinates the return of a Florida resident to the United States.

**Presumptive Positive:** A Presumptive Positive is when a state health lab has a positive test without CDC confirmation.

**Confirmed:** A Confirmed status is given when the Presumptive Positive sample is then confirmed by the CDC.
