INSTRUCTIONS FOR PREPARING A SITE PLAN (ALUMINUM CONSTRUCTION)

Use these instructions and the sample below to create your site plan.
You may not simply "fill in" this sample. Your site plan **MUST** be drawn to reflect your individual site, and you must include all measurements shown.

On a sheet of paper (between 8-½ x 11 and 24 x 36), draw **YOUR INDIVIDUAL PROPERTY**. Your drawing must be to scale and include adjacent street(s) and roads(s) and the name of each, and have a direction arrow indicating north.

- I. Your site plan must **SHOW ALL BUILDINGS**, mobile homes, garages, sheds and any other structures that exist on the property, regardless of the reason for requesting a permit. Show all **TREES**, and the size and location of all **SIGNS**.
- II. If the requested permit is for an **ADDITION**, show the existing structure(s) with solid lines and the addition(s) with dotted lines.
- III. After locating all structures on your property, show **DISTANCES** in feet from lot lines and for key elements of the plan (as illustrated by the circles in the sample, below).
- IV. **SIGN AND DATE** your site plan drawing before submitting it with your permit application.
- V. The drawing below is **SAMPLE ONLY**. Your lot and building(s) will differ in size, shape and scale. Your drawing must accurately reflect **YOUR PROPERTY AND YOUR PROJECT**. Where the shapes of building(s) differ, include measurements for the offsets from the lot lines or other parts of the building(s). You may **DRAFT OR HAND-DRAW** your plan, or you may submit a signed and sealed survey showing the elements discussed above.
